

CARE & MAINTENANCE

- When ever possible, avoid exposure to extreme weather conditions such as direct intense sunlight, or sub-zero temperatures.
- Use a stiff bristle brush to remove dirt and dust from carpeting.
- Only use a mild cleaner with a citrus or water base to remove stains. Always test an inconspicuous area for discoloration first.
- Never use solvents or lacquer base cleaners.
- Never expose any of the speaker components to direct rain or liquids. If this occurs stop using the equipment immediately and contact a qualified repair consultant.

WARNING:

Genz Benz enclosures are not designed to be suspended or hung from any surface of the cabinet. This can only be achieved with properly installed professional "flying hardware" and installed by qualified rigging technician.

OWNER'S MANUAL

Proudly manufactured in the U.S.A.

Ecab

Compact, dynamic, light-weight P.A. enclosure or monitor featuring a 12" or 15" woofer and horn/tweeter.

Stage Array Monitors

Our newly revised models are a low profile wedge which provide powerful response for varying monitor needs or up-front sound reinforcement. Designed with a 60 degree angle, the performer is given the greatest flexibility in stage placement and projection, while keeping feedback to a minimum. The conical waveguide provides excellent output and wide dispersion. These two models also feature stand adaptors for F.O.H. use.

FEATURES:

- Quality hand-built craftsmanship.
- Durable light-weight construction.
- Computer designed venting for precision performance and durability.
- Attractive and durable black carpet.
- Black round perforated 18 gauge speaker grills.
- Classic designs and appearance.
- High output speaker and compression horn driver.

SET UP TIPS

- Always survey the area you wish to cover with your speaker system to make sure that your system is adequately matched for the venue.
- Use good judgment when placing your speakers for audience coverage so that the speaker system will disperse over your audience and not directly at ear level. (Remember, high frequencies are absorbed much easier by people, curtains and other soft materials; while low frequencies are not so easily absorbed)
- Always use good quality speaker cables and never use guitar cables for hooking-up your speaker system.
- **Important: Always use caution when connecting speakers to an amplifier source. The power amp should be off when making connections.**
- **Severe hearing loss is possible if subjected to extended durations of high-output sound levels.**
- **Always wear hearing protection whenever possible.**

Ecab

ecab-112T	100W/200W	70-20K Hz	97 db	8 ohm	24 lbs.	18 1/2"x15 1/2"x13"	4K
